

## **HISTORY OF: City-County Planning Commission**

The present City-County Planning Commission of Warren County can trace its origin to the formation of the Planning and Zoning Commission for the City of Bowling Green, Kentucky, on April 23, 1954. The first Planning and Zoning Commission met on May 19, 1954, at 10:15 a.m. and consisted of the following individuals:

City Representatives: C. W. Lampkin, Ex Officio - Mayor, City of Bowling Green; Robert Graham, Ex Officio - Chairman, Public Works Board; Mrs. Wallace Barr, Sr.; Mrs. J. L. Thurber; and Herbert Smith

County Reps: Bennie Stephens, Ex Officio - Warren Co Rd Engineer; and J. H. Barnard

Over the next decade, the Planning Commission had several name changes, each reflecting its changing role within the areas it served. In 1958, the Commission's name changed to Bowling Green-Warren County Planning and Zoning Commission. On August 1, 1966, the name of the Planning Commission was changed to its current name -- the City-County Planning Commission of Warren County, Kentucky. On August 24, 1966, the City of Bowling Green, City of Plum Springs, City of Smiths Grove, and Warren County Fiscal Court signed an inter-governmental agreement creating the joint planning unit and joint Board of Adjustments.

The Planning Commission was created under the authority granted by Chapter 100 of the Kentucky Revised Statutes. Today, the Planning Commission is a joint commission consisting of five municipalities -- Bowling Green, Plum Springs, Smiths Grove, Oakland, and Woodburn -- and Warren County. The Planning Commission itself consists of twelve members - four City of Bowling Green representatives, four county representatives, and one representative each from Plum Springs, Smiths Grove, Oakland, and Woodburn.

The Planning Commission today provides a variety of services to the public. Among its primary functions are:

- Implement the Comprehensive Plan, Zoning Ordinance and Subdivision Regulations and prepare amendments thereto;
- Conduct public hearings on the zoning map amendments, development plans, right-of-way closings and street name changes;
- Supervise the construction of streets and public drainage facilities in new and re-developed areas;
- Provide support to the Storm Water Management Authority by maintaining flood plain maps; reviewing all developments for compliance and storm water management regulations; and maintaining the Community Rating System program for the City of Bowling Green and Warren County;
- Maintain the official maps program and Geographic Information System;
- Maintain the 911 database and assign house numbers;
- Provide staff support to the Board of Adjustments; University District Review Committee; Urban Growth Overlay District Committee; Warren County Code Enforcement; Greenways Commission and Historic Preservation Board.
